Gagnasafnsfræði Heimaverkefni 2

Ragnar Björn Ingvarsson, rbi3

5. september 2024

1

a) Accounts: acctNo, type, balance

Customers: firstName, lastName, idNo, account

b) Accounts:

(12345, sparisjóðsreikningur, 13000),

(23456, hlaupareikningur, 2000),

(34567, hlaupareikningur, 250)

Customers:

(Jón, Sigurðsson, 901-222, 12345),

(Sigríður, Jónsdóttir, 805-333, 34567),

(Línus, Gauti, 805-333, 23456)

f) *acctNo:* CHAR(5) ef engir reikningar munu eiga sér stað með númerið en INT ef svo

er.

type: VARCHAR(30) 30 ætti að vera nóg fyrir allar týpur reikninga.

balance: INT

firstName: VARCHAR(50) 50 til að gera ráð fyrir flestum mögulegum nöfnum.

lastName: VARCHAR(50) eins hér.

idNo: CHAR(7) char hér þar sem lengd virðist ekki eiga að vera breytileg.

account: CHAR(5) eins hér og með acctNo þar sem ef reikningar eru notaðir þá er

betra að hafa INT

```
a) SELECT address
  FROM MovieStar
  WHERE name LIKE 'Alec Baldwin';
  Baldwin Av.
b) SELECT address
  FROM MovieStar
  WHERE name LIKE 'Harrison Ford';
  Prefect Rd.
c) SELECT starName
  FROM StarsIn
  WHERE movieTitle LIKE '%Star%' OR movieYear < 1940;
  Carrie Fisher
  Mark Hamill
  Harrison Ford
d) SELECT name
  FROM MovieExec
  WHERE netWorth < 50000000;
  Calvin Coolidge
```

```
sqlite> SELECT address
   ...> FROM MovieStar
   ...> WHERE name LIKE 'Alec Baldwin';
Baldwin Av.
